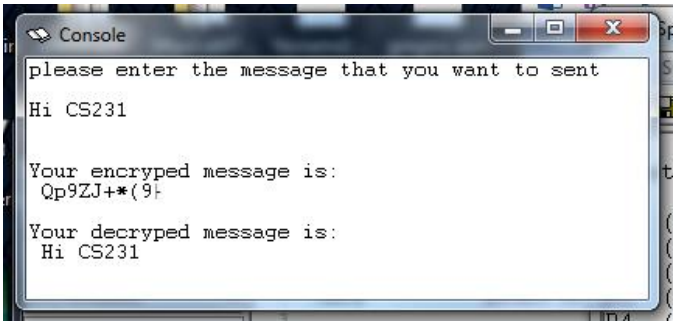
Inputting String

Each labs worth 10 points
All lab work must be initiated during the lab hour and be completed during the lab hour.
Only when additional time is required, the student may turn the lab in the following day for 2 points off.


1. Write a program that prompts the user for a 9 character line of text. Then you need to encrypt the text using Number 10. Then you are requiring decrypting the massage and outputting it.
   A sample result could be:
